GEBERIT

Water is our element.

South East Asia product brochure 2014/2015

Know-how from Switzerland

GEBERIT
GEBERIT

Since the day it all began in 1874 in Switzerland, we have been defined by our experiences. Geberit has been among the pioneers of the industry and is still setting trends with comprehensive system solutions.

With approximately 6,200 employees around the world and offices in more than 41 countries, Geberit stands for innovation, durability and ecological efficiency.

1874 Caspar Melchior Albert Gebert (1850–1909) opens a plumber's shop in the Old Town of Rapperswil (CH). At the turn of the century, his two sons Albert Emil and Leo join the company and start the production of wooden flushing cisterns.

1905 Albert Emil Gebert succeeds in producing the first wooden flushing cistern that is lined with lead and equipped with leaden fittings, under the brand name "Phoenix".

1952 The first PVC flushing cistern is produced.

1964 Introduction of the first concealed cistern.

1999 In the year of the 125th anniversary of the company's founding, Geberit succeeds in being listed on the stock market.

2004 Geberit takes over the German Mapress Group, the largest acquisition in company history.

2005 Formation of Geberit International Sales AG.

2010 The newly established Asia/Pacific headquarters in Shanghai as well as the European Geberit Logistics Centre in Pfullendorf (DE) are inaugurated and put into operation.

2012 Geberit share included in the SMI (Swiss Market Index).

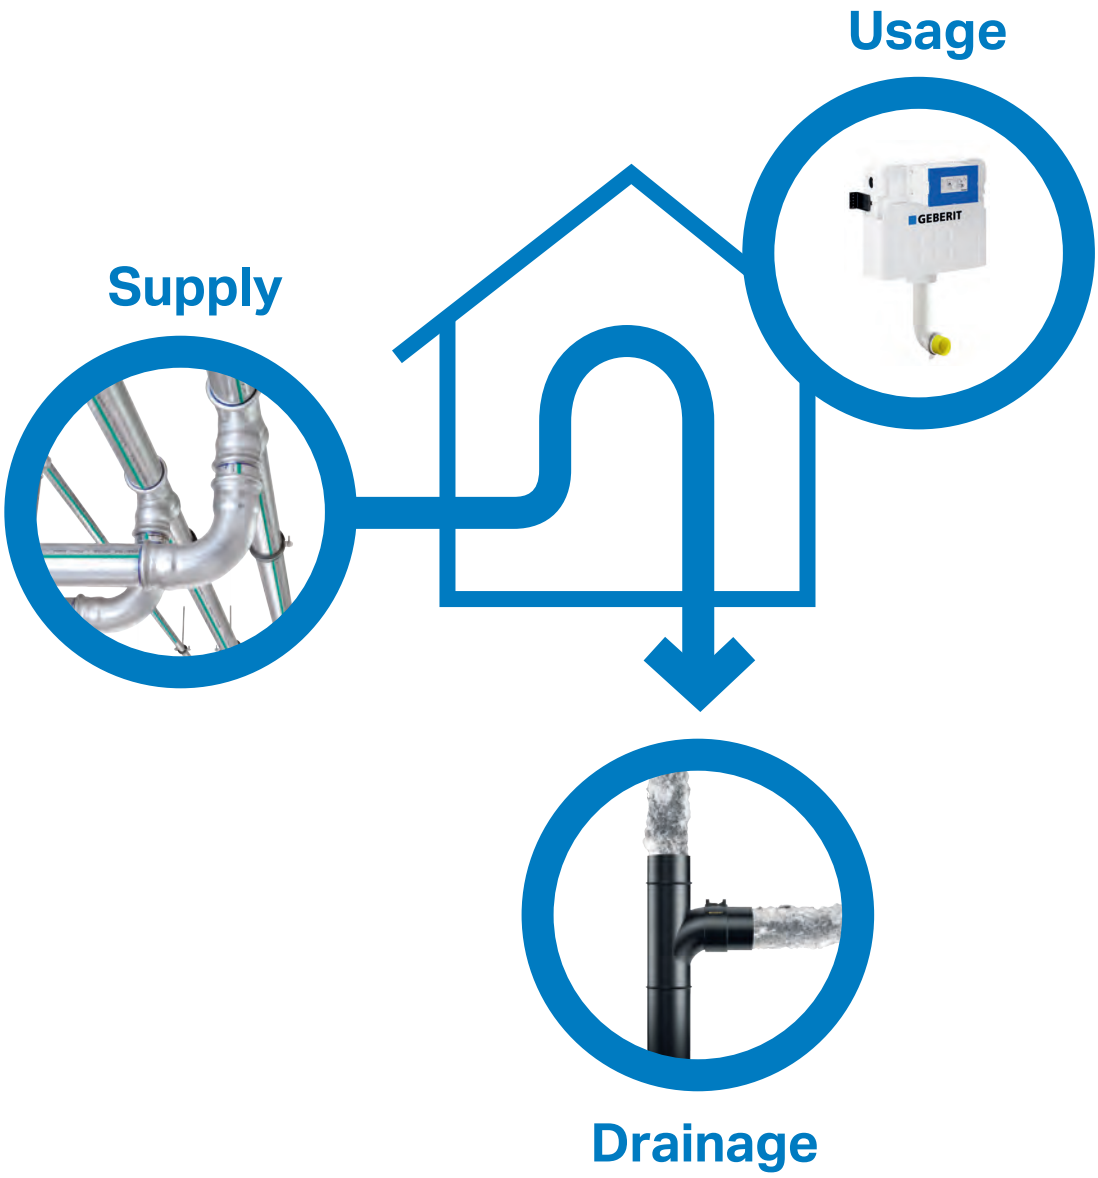
From beginning to end.
Geberit systems deliver solutions for water supply, usage and drainage.



Supply

Geberit supply systems are easy to install, extremely resistant to high pressures and temperatures, and also transmits minimal noise. The Geberit piping systems which can be tailored to your residences ensure that no water will be wasted and that hygiene is always of the highest standards.

Usage

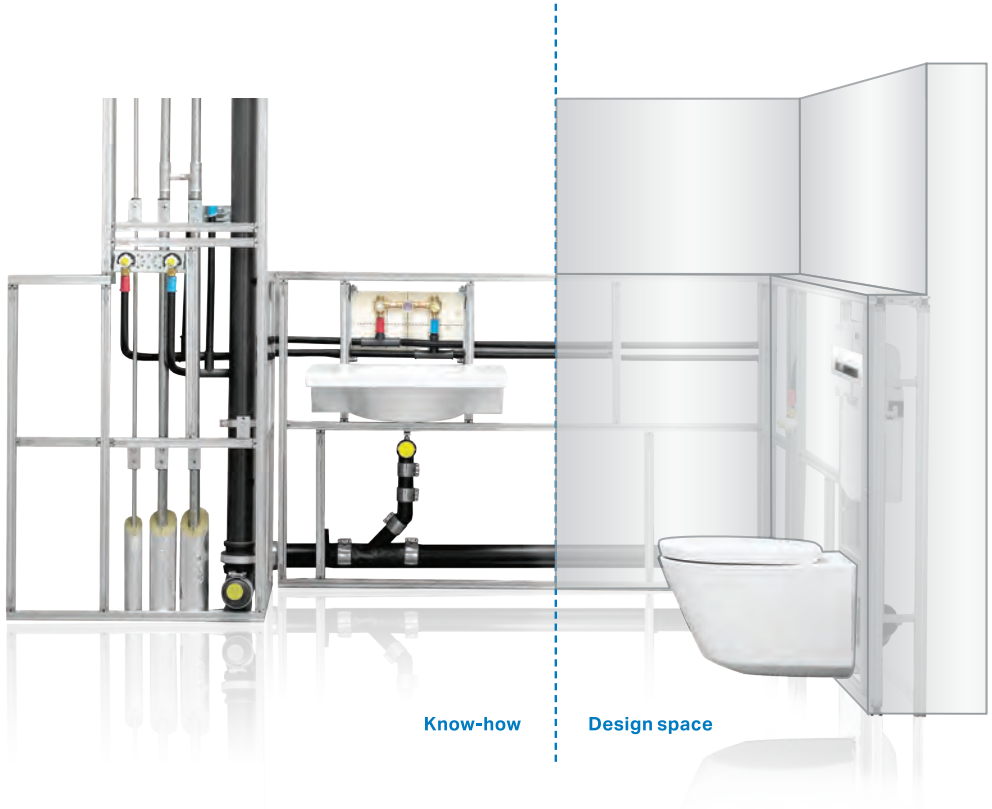
Geberit sanitary systems comprise of high performance technology which provides buildings and homes with clean water for consumption as well as for washing purposes used by the sanitary systems.

Drainage

Geberit waste and drainage systems cover solutions for domestic, industrial and commercial applications.

Why concealed and wall-hung?

With Geberit installation systems, the pipes, cisterns and the connections are no longer visible but hidden within the Geberit preWall installation.



One of the benefits of a concealed preWall installation is that water and drain connections no longer determine the position of the WC or urinal, but is determined by design and planning of the room. Having a preWall and wall-hung systems give you a free reign of bathroom designs.
A bathroom with concealed installations will feel more spacious than a conventional bathroom; portraying elegance from floor to ceiling.

Concealed installations are more hygienic because they offer clean lines and clear surfaces, which allows easy cleaning. The wall-hung toilet makes it possible to clean the entire floor, including beneath the toilet. There is no risk of the toilet detatching from the wall as the Geberit systems are able to withstand weight up to 400kg.

- Premium quality
- Modern bathroom design
- Easy cleaning, no obstacles on the floor
- Reduced water costs due to dual flush
- Geberit systems can withstand weight up to 400kg
- Optimisation of space for an improved interior feel
- Accessible any time

Clearly invisible.

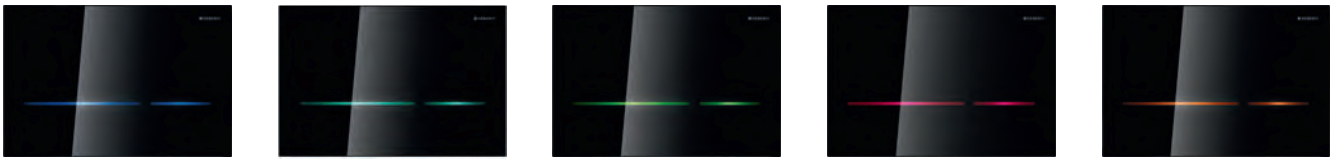
Touchless beauty.
Geberit Sigma80.

The innovative Geberit Sigma80 flush plate only requires the wave of a hand to initiate the flush process. An automatic standby mode ensures that electricity consumption is kept to a minimum. The touchless flush plate is available in two glass versions: black or with a mirror surface.

Comes equipped with five different colour settings for the flush lights



Excellent touch.
Geberit Sigma70.

New

Protruding slightly from the wall, the Geberit Sigma70 actuator plate appears to float in front of the wall. Using the new servo technology, a gentle push on the actuator plate is all it takes to trigger the flush. Made from a compact piece of glass or stainless steel only a few millimeteres thick, a customisable surface is also available.

Design flexibility.
Freedom of placement.

Geberit pneumatic concealed cistern and actuator plates.

The contemporary design of the pneumatic actuator fits any bathroom setting and allows design flexibility. Uniquely designed by Geberit, the actuator does not need to be placed in front of the concealed cistern, thus allowing flexible positioning of the concealed cistern. Specially designed parts allow both dry and wet wall installation.

Geberit AquaClean Series.
A new dimension in cleanliness.

Introducing the new Geberit AquaClean Sela, winner of three coveted design awards, it is designed by architect and designer, Mattheo Thun. Geberit AquaClean Sela fits virtually in any bathroom environment thanks to its simple contours.

New

Geberit AquaClean Sela.
Sleek and intelligent.

Geberit AquaClean Sela cleans you with a gentle, airy water spray at body temperature. The intensity of the water spray can be adjusted to one of five levels, while the oscillation ensures a pleasant cleaning experience. Thanks to the integrated user identification function, the water starts heating automatically as soon as you approach the WC. The ceramic unit has a special coating making it dirt-repellant, resulting in effective self-cleaning. The Geberit AquaClean Sela seat has extremely comfortable ergonomics and its seat cover is easy and quick to remove, making cleaning a lot easier. Just like all Geberit AquaClean models, this product also complies with European Ecodesign requirements and, thanks to its energy-saving function, consumes a minimal amount of energy even in standby mode.

product design award 2013

interior innovation award 2013 Winner

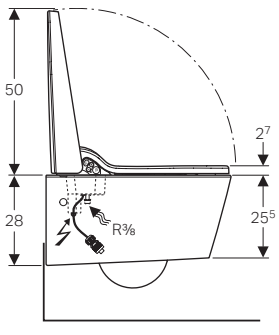
DESIGN PLUS powered by ISH

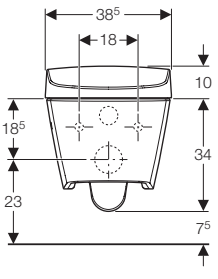
1 A gentle, airy water spray washes you clean with an intensity that is comfortable for you – choose from five different spray pressure levels.

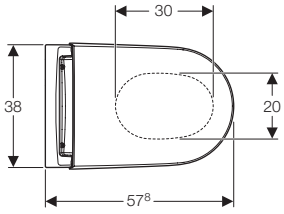
2 As with all models, the shower nozzle is rinsed with clean water before and after you use the toilet.

3 The small and intuitive remote control makes the shower function really easy to switch on and adjust.

4 Alternatively, use the clearly laid-out control panel, concealed elegantly beneath the lid.







Geberit AquaClean Sela

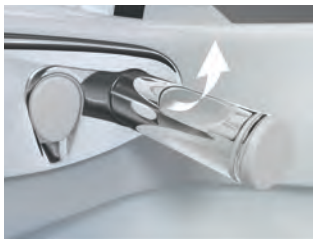
146.147.11.1	White alpine

Geberit AquaClean 8000*plus*.
The deluxe pampering programme.

Geberit AquaClean 8000*plus* leaves nothing to be desired and offers many extra pampering functions in addition to the water spray. As soon as the user sits on the WC, the automatic odour extraction function switches on, keeping the air in the bathroom fresh. The spray temperature and intensity can be adjusted to suit personal preferences. While the pulsating massage function has an invigorating effect and the soft lady wash guarantees gentle personal hygiene for ladies. After the spray has finished, the integrated warm-air dryer dries you off in comfort. All functions can be individually adjusted and up to four user profiles can be saved.

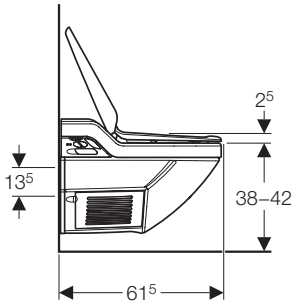
The intensity, temperature and properties of the jet of water can be individually adjusted.

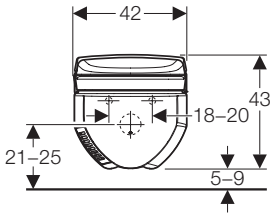
Beneficial for all the senses: the odour extraction systems starts up as soon as you sit down.

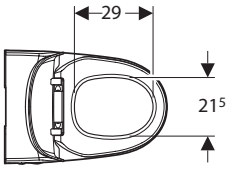


Drying yourself with warm air is extremely comfortable and gentler on your skin.

Adjust all the functions to suit your requirements. Once your adjustments have been saved, they can be retrieved any time.





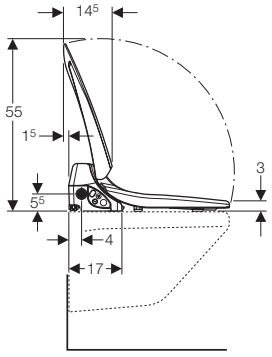


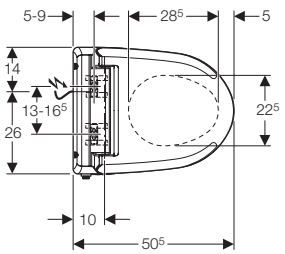
Geberit AquaClean 8000*plus*

180.100.11.1	White alpine

Geberit AquaClean 4000.
Hygiene for every home.

Geberit AquaClean 4000 offers all the basic functions you need from a WC with integrated shower function. The easily installed WC enhancement solution is compatible with most WC models. The practical enhancement solution washes you clean with a gentle and airy water spray at body temperature and at the intensity you choose. The control panel is easily accessible and self-explanatory. And as with all Geberit AquaClean models, the Geberit AquaClean 4000 has a soft-closing lid.





Geberit AquaClean 4000

Distinctive elegance.
A modern alternative.

Geberit Monolith for WC.

A truly good design makes a strong impression not only with its shape but also with its functions, materials and technology behind it. Geberit Monolith WC module conceals all the necessary technology behind a simple design concept which is quick to install and offers plenty of scope for creativity.

The internationally award-winning design can be used in combination with a wide range of sanitary wares and is easily installed, using existing connections.

Modern alternative to the traditional toilet, the Geberit Monolith WC module certainly makes a bold statement in the bathroom, adding a beautiful, elegant touch to your ideal bathroom.

Perfection without edges

The slim, modern Geberit Monolith design finished with brushed metal housing and highly-polished tempered glass, it is hard to believe all the necessary technology of a WC is cleverly concealed behind the glass and within 10.6cm.

Geberit Monolith also offers the added bonus of water-saving dual flush technology plus easy to clean surfaces without hidden corners.
