HANSAFORM

NICE ON THE EYES.

GOOD FOR THE ENVIRONMENT.

A CLEAR LINEAR
DESIGN
STATEMENT.
HANSA**FORM**.

QUALITY Excellent longevity, greatest satisfaction.

GREEN RESPONSIBILITY Technologies for the future.

SAVING WATER Every day anew.

The name says it all: **HANSAFORM** is a statement for a modern design language, commitment to the principles of minimalistic design and a declaration of love to geometric shapes. The clear linear, austere design and flat surfaces of the range are harmoniously integrated into architecture characterised by its purity of form and cubistic elements.

But **HANSAFORM** is more than a straightforward statement for excellent design. It is also wonderful proof of the fact that timeless looks, quality and sustainability can be blended perfectly. Resource friendly manufacturing procedures and durable, environmentally friendly product concepts go hand in hand. HANSA fittings are silent, easy to maintain, while preserving water quality and guaranteeing maximum hygiene.

This is based on the HANSA Green Responsibility philosophy which underpins cutting-edge, ecological, intelligent and water-saving fitting technology.

The HANSAFORM basin fitting is seminal for the complete HANSAFORM range: geometric and cubistic, clear and precise, simply perfect.

A HOMAGE TO GEOMETRY.

Irrespective of whether at the wash basin or in the shower, HANSAFORM combines the individual elements of the bathroom to ensure an overall visual experience. The striking design concept of the HANSAFORM range creates a sense of elegance, turning the bathroom into an oasis of tranquillity which is characterised by right angles as the recurrent element.

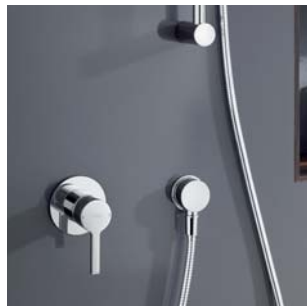

HANSAFORM offers various design options for stylish showers. The HANSAVIVA shower range is perfectly suited to HANSAFORM. It combines hand showers, overhead showers and wall bars into a modular shower system, while allowing maximum creative freedom.

Two, which are perfectly harmonised in form and function: HANSAFORM shower solutions and the HANSAVIVA range.

(Fig. right) Exposed solution with concealed connections.

(Fig. below) Various elegantly concealed versions and HANSAVIVA hand shower (height adjustable) with wall bar set.

A STATEMENT FOR TOP QUALITY.

HANSAFORM is not only nice on the eyes, but also provides years of enjoyment due to the functional and practical details. The particularly smooth operation offers a level of comfort which can be enjoyed every day anew. An essential detail for families with small children: the integrated hot water stop prevents the risk of scalding, while saving energy.

The minimum gap dimensions and the elegant concealed solutions are extremely easy to clean. The shine of the high quality surfaces is therefore quickly restored. Furthermore, **HANSAFORM** is very impressive due to the high quality, extremely durable materials, an excellent finish and its low water consumption.

The bathtub area, in particular, can be a real design statement in contemporary bathrooms. **HANSAFORM** offers the ideal solution for every planning problem.

(Fig. below) The elegantly designed concealed version with diverter for the separate bathtub spout and for the **HANSAVIVA** hand shower.

THE NAME SAYS IT ALL:
HANSAFORM.

The name HANSAFORM says it all. With this new range, the exciting combination of geometrical shapes and surfaces defines a completely novel design form. Upright and confident, HANSAFORM has one believing that it is truly proud of its inner qualities. The materials, finish and technology are state-of-the-art.

Half is enough. We therefore have a special sense of responsibility for the precious resource with which we work every day.

A special stream former reduces the flow rate from 12 l/min to 6 l/min for HANSAFORM basin mixers. The volume of the spray has been exceptionally retained even though the actual flow rate has been cut by half.

At least one product of this range meets the specified criteria

Restriction of the flow rate to 6 l/min and intelligent stream formation ensure optimized water consumption with full comfort.

Extremely quiet.

Fitting complies with the strict conditions under noise protection class 1.

WATER SAFE. Hi-tech functional core.

Preserves water quality.
